

CUSTOMER NO. 30430

PATENT APPLICATION

Docket No. 99-C-179

REMARKS

The foregoing amendments are respectfully submitted for entry after allowance pursuant to 37 C.F.R. 1.312.

The amendments to the specification are presented to correct the structural name given to one of the terminals of the bipolar transistor 210. The change to "base" from "gate" when referring to the control terminal of transistor 210 does not introduce new matter and merely provides the correct nomenclature for that terminals as understood by those skilled in the art.

Respectfully submitted,

JENKENS & GILCHRIST, P.C.
